# CULLIGAN® HIGH EFFICIENCY

### Water Softener

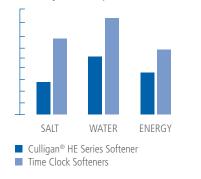

### **EXPERIENCE THE DIFFERENCE** CULLIGAN WATER CAN MAKE.

### **46**%

### COST SAVINGS

Reduces operating costs up to 46%\*\* with patented technologies to optimize salt, water and electricity consumption.

## Introducing the World's Most Efficient Water Softener.\*

For high-efficiency water softening, nothing can match the intelligent design of the Culligan High Efficiency (HE) Water Softener. The Culligan HE Water Softener is intelligent enough to let you customize your water's softness. This full-featured high-efficiency water softener is great for any size home. The 1" valve allows for uninterrupted water pressure and varying tank sizes ensure consistent quantities of soft water.

### **SYSTEM BENEFITS**

- Reduces operating costs up to 46%\*
- Real time status updates
- Controls the feel of your water
- Automatic adjustments to water conditions\*

\*\* 46% less in operating costs versus a time clock regeneration softener and when used with the Aqua-Sensor®.

<sup>\*</sup> HE Softener when configured with proportional up flow brining with Aqua-Sensor®.

# **CULLIGAN®** High Efficiency Water Softener Product Specifications

### **Patented Smart Technology**

- Automatic bypass valve provides the convenience of bypassing the water softener for outside watering or other uses that don't require soft water.
- Exclusive Culligan<sup>®</sup> Soft-Minder<sup>®</sup> meter monitors daily water use and provides advanced system diagnostics.
- The easy-to-read back-lit display with digital clock lets you know your softener is working and warns of system malfunctions.
- Culligan's Dial-a-Softness<sup>®</sup> control lets you choose the way you want your water to feel.

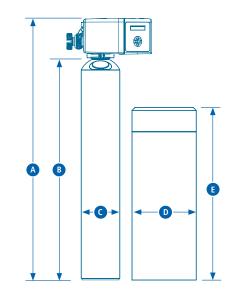

### **Options Available**

- Culligan's optional Aqua-Sensor<sup>®</sup> technology automatically adjusts to changes in water conditions so the softener only regenerates when needed, saving you salt, water and money.
- Optional proportional brining allows your softener to only regenerate that part of the resin bed that has been exhausted, which reduces salt usage.

#### **Exclusive Reliable Design**

- Exclusive, non-corrosive valve using motorized pistons that provide more reliability than rotary valve systems.
- High-impact Quadra-Hull<sup>®</sup> Tank stands up to outdoor use with a four-layer design that resists UV rays, rust and corrosion. Limited lifetime warranty.
- With the Cullex<sup>®</sup> softening resin your water softener is assured stability and long life. High-grade quartz underbedding evenly distributes water to maximize flow rates.
- Long-lasting brine tank with corrosion-proof components and Dubl-Safe brine refill control assure proper operation.
